# DISCOVER THE CARRARA QUARRY WITH ETRUSCO.

In the north of Tuscany, the landscape is characterised by the wild mountain ranges of the Apuan Alps. What appears at first glance to be a thick blanket of snow turns out on closer inspection to be the white gold of Italy: the marble quarries of Carrara. This unique marble has been quarried in Italy for centuries and is still of great importance in art and interior design. The marble was used by sculptors and builders for their gigantic works of art. Carrara's most famous work of art is the imposing statue of David by Michelangelo. In the small town of Carrara, the towns houses merge with the characteristic white slopes and thus create a unique landscape. Follow us and embark on a discovery tour of Carrara with Etrusco.

The "mass in running order" (MIRO) according to VO (EU) 1230 / 2012 is the mass of the unladen vehicle including the driver (75 kg) and full tank of fuel (90 %) as well as the basic equipment: Fresh water tank with reduced volume (20 kg), gas bottle (15 kg) and cable drum (4 kg).

The maximum technical permissible laden mass (MTPLM) as well as the maximum axle loads should not be exceeded by personal belongings, number of passengers or optional equipment. The maximum user payload and permitted number of persons will reduce accordingly to optional equipment. If you order your vehicle with additional equipment and / or traveling with several people, you should check whether it makes sense to load the vehicle."

The information regarding delivery, appearance, performance, dimensions and weight of the vehicles correspond to the existing knowledge at the date of printing and to the European homolo-
